

Insele Solar

RMS-330 REMOTE MANAGEMENT SYSTEM Smart Power Control for Remote CCTV Systems

Our RMS devices are smart digital controllers designed to manage power for 12V and 48V remote CCTV camera setups. They ensure your cameras stay powered using solar backup and let you manage everything remotely.

Key Features:

- Keeps your CCTV running with solar power backup
- Sends alerts for tampering or low battery
- Easy remote monitoring and control

The RMS connects to your network via Ethernet and sends power and battery data to a secure cloud platform. This system is perfect for managing multiple camera sites and is available as a monthly service.

The RMS system is a total power and insight solution.
